

## Battle proven for wherever and whenever you need it.

### Chelton's Vehicle Intercom Systems Suite

Chelton's Vehicle Intercom System portfolio is tough and tested with over 150,000 systems in service around the world. Trusted by some of the most established militaries, including the US Armed Forces with over 130,000 units across multiple vehicle platforms, Chelton's VIS is the professional system of choice.

Chelton's AN/VIC-3 and AN/VIC-5 (previously Northrop Grumman and Cobham Intercoms) are built to full military specifications to enable safe, secure, fast and reliable voice and data communications.

#### Simple, no-fuss, easy to use

Chelton's VIS is simple and straightforward to use in harsh environments. Not only are they tough, but they are reliable, easy to use even with gloves on, and backwards compatible.

#### World's most widely used system

With over 150,000 units in service around the world, Chelton's VIS is the professional system of choice and also benefits from being fully qualified and US Army FAT tested.

#### Battle Proven

Chelton's VIS has been proven in recent battle heavy environments to provide essential communication capabilities.

#### Protects Hearing

Active Noise Reduction on compatible headsets improves speech intelligibility, reduces fatigue and protects the user's hearing.

#### US Army & Chelton repairs

The US Army has established its own organic depot support capability which provides quick repair turnaround.

#### High MTBF

Our expertise and innovative production methods ensure a high Mean Time Between Failure rate giving our products high reliability and a long lifetime.
