innovations in plastic packaging

Reconditioning Box LogisticSystem

One box - countless possibilities!
Packaging system for safe storage and transportation of tools during reconditioning

Material

→ box, lid and latches in polypropylene (PP), scratch-resistant

→ trolley in ABS

→ stable, durable and water-resistant foam with high density

Product Range

→ boxes in light grey

→ trolley in red

→ foam in black

→ separators in red

Product features LogisticSystem

Boxes

→ available in three sizes with padded lid

→ boxes 175 and 235 can be combined with the rose plastic SystemBoard

→ standardized, stable and stackable box system

→ can be labeled and combined with an optional trolley

Foam Trays

→ flexible for use with different tool lengths and diameters

→ made of high-strength material, with recessed grips

→ adjustable separators for different tool lengths

→ lower risk of injury due to lying transport of tools

→ can be laser-engraved with a minimum quantity of 50 pieces

SystemBoard

→ ideal for sorting, organizing and transporting of tools

→ automatable, flexible system with various adjustable inserts

→ suitable for immersion baths for cleaning and coating
